

CS322- Lab 1

Assembly language Programming

The goal of this lab is to familiarize the students with 8085 assembly language features.

Task 1: Run the sample programs in the simulator

Task 2:

Select 10 problems of your own and write corresponding assembly language programs to solve them. (submit a single pdf with all codes and program outputs). State clearly the problem followed by the code with comments.

(10x10=100)

Your Lab Assignment 1 (100 points)
